

Fine, dry fog
composed
of droplets
between 6-10
microns

Next Generation Mobile Sanitization Dispenser

SaniCart™ is a mobile, fogging sanitization system, used to protect against surface and airborne viral, bacterial, and mold contamination. The SaniCart™ technological breakthrough involves a patented micro-fog nozzle, which humidifies the entire room with any disinfectant including peracetic acid, hydrogen peroxide, chlorine dioxide, citric acid, or any other EPA-approved viral biocide.

Compared to hand-held or aerosol sprayers, this fine disinfecting fog efficiently covers the complete indoor environment, including all surfaces and hard-to-reach areas without leaving moisture and residues.

SaniCart™ technology helps reduce human error and minimize user exposure to sanitizing chemicals and pathogens, while also saving time, money, and labor.

✓ EFFECTIVE

6-10 micron droplet size ensures disinfecting solution coats all surfaces without leaving behind any damaging residue.

✓ VERSATILE

Easy maneuverability allows it to work in any environment where effective sanitation is required, including guest rooms, dining areas, restrooms, common areas and banquet spaces.

✓ EFFICIENT

Gets in all the nooks and crannies without excess waste and disinfects most hotels inside of 20 minutes.

✓ ECONOMICAL

Fraction of the cost compared to manual hand held sanitation processes. Proactive approach for preventing liability for cross contamination.

One system with two delivery methods for the Hotels, Restaurants, Senior Living and other commercial operations.

Remote Room Sanitization

Its simplistic design allows housekeepers to set an automated sanitation protocol that delivers your disinfectant of choice in less than 20 minutes. Average cost is < \$1.00 per room.

Handheld Targeting

Users have the capability of detaching the fogger and directly targeting higher touch areas, when desired. The fog momentum create a 5 ft throw that ensure it gets deep into the concentrated area. No PPE required with non-toxic disinfectants.

Specs and Features

- Adjustable auto Start/ Stop timer
- Powder coated steel frame
- Hard rubber wheels
- Fully adjustable and detachable fog nozzle
- Spray flow rate of 0.5-1.0 GPH
- Dimensions: 11" x 18" x 32"
- ~70 lbs Dry 112 lbs Wet
